SCIENCE FAIR

Science Fair 4th Grade and 5th Grade Science Fair Open House

On Monday evening, January 30th, at 6:15, we will host an Open House for 4th graders and 5th graders and their families to view the Science Fair projects and winners. Students have worked really hard on these projects. The students learned the scientific process by coming up with a question, creating a hypothesis, planning out their materials and procedures, completing several tests of their experiment, and then analyzing results to come up with a conclusion. Please join us for this exciting event!

GES will be participating in Jump Rope for Heart during the week of February 6-10. Students will learn about the importance of taking care of their heart and how it works and the importance of helping others through this service learning project. Don't forget to turn in pledge envelopes by February 15.

Our GES Student Council will be sponsoring a service and learning project called Pennies for Patients. During the weeks of February 13-March 3, students are asked to bring in pennies or spare change. This change will be donated to The Leukemia and Lymphoma Society to help in the fight against blood cancer.

UPCOMING EVENTS

- January 30 Science Fair
- February 3 End of Midterm Grading Period
- February 6-10 Jump Rope for Heart
- February 13 Pennies for Patients begins
