

Greensburg Community Schools Coronavirus Plan

The following procedures will pre-empt any regulations from the IDOE:

At this time, schools will monitor students, using normal school procedures to assess symptoms. Patients with confirmed 2019-nCoV infection have reported mild to severe respiratory symptoms of fever, cough and shortness of breath. For any student exhibiting all of these symptoms we will notify parents if observed at school. It is important to know if, within the last two weeks, a student has traveled to Wuhan, China or been in close contact with a person that has a suspected case of the virus. We will need help from parents in letting us know this information.

Schools should encourage all students and staff to practice good health hygiene to prevent the spread of any illness, including viruses. Steps include:

- Washing hands often with soap and water for at least 20 seconds.**
- If soap and water are not available, using an alcohol-based hand sanitizer. Sanitizers are available within each school building.**
- Avoid touching your eyes, nose, and mouth with unwashed hands.**
- Avoid close contact with people who are sick.**
- Stay home when you are sick.**
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.**
- Clean and disinfect frequently touched objects and surfaces. All classrooms are being disinfected nightly.**
